## EXPERIENCE

### Persistent, Hyderabad — *Engineering Lead*

OCT 2024 - PRESENT

### Helius Technology, Hyderabad — *Senior Software Engineer*

SEP 2023 - OCT 2024

- Facilitated compliance with linting rules and commit message standards, ensuring cohesive project development.
- Devised innovative solutions and streamlined workflows, significantly improving deployment efficiency and reducing development bottlenecks.
- Contributed to a React Native project for six months and currently advancing a Next.js project.
- Enhanced application security by implementing measures against overlays, screenshots, screen recordings, and unauthorized remote access, in accordance with user permissions.
- Mitigated security vulnerabilities by combatting reverse engineering, root access, tap jacking, repacking, and debugging issues.

### MyOperator, Noida — *Senior Software Developer*

SEP 2022 - MAR 2023

- Improved UI/UX by adding features like sorting and filtering, leading to an enhanced user experience.
- Integrated unit tests and transitioned to TypeScript to minimize type errors and data inconsistencies.
- Fixed audio playback issues encountered while navigating across screens and cards.

### Veative Lab, Noida — *Mobile Developer*

AUG 2019 - AUG 2023

- Managed a development team to create reusable components and establish a solid project structure from the ground up, incorporating video conferencing, AWS Auth, Firebase remote config, and payment gateway functionality.
- Developed a native module to support Unity player on Android and iOS platforms.
- Designed a comprehensive library for Unity Player to seamlessly
